

Curriculum vitae

Jane Koorevaar

About me

I am Jane, a first year MsC student Industrial Design Engineering at the TUDelft. I am 22 years old and currently living in a student house in Delft. I am very passionate about my study. Design is everywhere, and with Industrial Design one learns all its different aspects. I am mostly interested in the idea generation phase and in the creative part of the design process. I hope to one day pursue a career in these aspects of the Industrial Design Engineering field. In my spare time I like to draw and work on my own design projects.
